

ANKIT SINGH NEGI

DATA ANALYST | DATA SCIENTIST

+91-7055147998 | negi88898@gmail.com | [linkedin.com/in/ankit-negi-68b645215](https://www.linkedin.com/in/ankit-negi-68b645215) | github.com/negi88898 | Dehradun, Uttarakhand, India

PROFESSIONAL SUMMARY

Data Analyst with end-to-end ownership of data projects — from raw data collection through cleaning, modeling, and dashboard delivery. Proficient in Python, SQL, Power BI, and Excel, with practical experience in ETL, statistical analysis, and machine learning.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, C, Java

Tools & Platforms: Power BI, MS Excel, Flask, Jupyter Notebook, MySQL, SQLite, Git, GitHub, VS Code

Core Competencies: ETL Pipeline Development, Statistical Analysis, Predictive Modeling, Customer Segmentation, Demand Forecasting, Dashboard Development, Business Intelligence, KPI Reporting

PROJECTS

India Rankings Analytics: UPA vs NDA (2004–2026) — Python, SQL, Excel, Power BI 2026

- Independently designed and built an end-to-end analytics pipeline comparing India's standing across 9 global indices (HDI, Corruption Perceptions, Press Freedom, Poverty, Unemployment, INR/USD) spanning 2004–2026, sourced from UNDP, World Bank, and RBI.
- Owned the full data lifecycle — engineered a SQLite database and Python (Pandas, Matplotlib) scripts to automate cleaning and visualization, then delivered results via an interactive Power BI dashboard and a stakeholder-ready presentation.

AI Lost & Found System — Flask, MySQL, Python, Similarity Matching 2025

- Independently built a Flask + MySQL web application end-to-end, implementing AI-based owner prediction using cosine similarity (~85% accuracy) and reducing manual lookup time by 60% through real-time search and full CRUD functionality.

Retail Customer Analytics & Demand Forecasting — Python, SQL, Power BI, K-Means 2025

- Analyzed 10,000+ retail transactions independently, applying K-Means clustering to segment customers into 4 actionable groups and building 3 Power BI dashboards covering revenue, churn, and demand forecasting.

Smart Traffic Control System — Java, OOP 2025

- Designed and implemented a multi-lane traffic signal simulation using Java OOP (inheritance, polymorphism, abstraction), reducing simulated wait time by 25%.

EDUCATION

Master of Computer Applications (MCA) 2025 – Present

DIT University, Dehradun · Machine Learning, DBMS, Data Structures, OS

B.Sc. — Physics, Mathematics & IT 2020 – 2023

Kumaun University, Nainital

CERTIFICATIONS & ACHIEVEMENTS

- SQL (Basic) — HackerRank Certificate of Accomplishment, July 2026
- Prepare Data for Analysis with Power BI — Microsoft (Microsoft Learn), December 2025
- Cleared IBPS PO & SBI PO Preliminary Exams — top percentile in Quantitative Aptitude & Logical Reasoning
