

ANKIT SINGH NEGI

DATA ANALYST | DATA SCIENTIST

+91-7055147998 | negi88898@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Dehradun, Uttarakhand, India

PROFESSIONAL SUMMARY

Data Analyst with end-to-end ownership of data projects — from raw data collection through cleaning, modeling, and dashboard delivery. Proficient in Python, SQL, Snowflake, Power BI, and Excel, with practical experience in ETL, data quality assurance, statistical analysis, and machine learning.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, C, Java

Tools & Platforms: Snowflake, Power BI, MS Excel, Flask, Jupyter Notebook, MySQL, SQLite, Git, GitHub, VS Code

Core Competencies: ETL Pipeline Development, Data Modeling (Star Schema), Data Quality Assurance, Statistical Analysis, Predictive Modeling, Customer Segmentation, Demand Forecasting, Dashboard Development, Business Intelligence, KPI Reporting, Agile/Scrum, API Integration

PROJECTS

Retail Banking Transaction Analytics Platform — Snowflake, Python, SQL, Agile

2026

- Designed and executed a Snowflake star schema (warehouses, stages, secure data-sharing views) for 12,000+ retail banking transactions, independently diagnosing and resolving real data-loading and referential-integrity issues during live execution.
- Built a Python (Pandas, NumPy, Requests) ETL pipeline with live FX-rate API integration and a data quality framework achieving a 94.9% clean-data pass rate, logging and excluding invalid records with documented reasoning.
- Authored a full Business Requirements Document and Agile backlog (epics, user stories, 3 sprints) with a requirement-to-output traceability matrix, and delivered secure, PII-free self-service SQL views for stakeholder consumption.

India Rankings Analytics: UPA vs NDA (2004–2026) — Python, SQL, Excel, Power BI

2026

- Independently designed and built an end-to-end analytics pipeline comparing India's standing across 9 global indices (HDI, Corruption Perceptions, Press Freedom, Poverty, Unemployment, INR/USD) spanning 2004–2026, sourced from UNDP, World Bank, and RBI.
- Owned the full data lifecycle — engineered a SQLite database and Python (Pandas, Matplotlib) scripts to automate cleaning and visualization, then delivered results via an interactive Power BI dashboard and a stakeholder-ready presentation.

Retail Customer Analytics & Demand Forecasting — Python, SQL, Power BI, K-Means

2025

- Analyzed 10,000+ retail transactions independently, applying K-Means clustering to segment customers into 4 actionable groups and building 3 Power BI dashboards covering revenue, churn, and demand forecasting.

AI Lost & Found System — Flask, MySQL, Python, Similarity Matching

2025

- Independently built a Flask + MySQL web application end-to-end, implementing AI-based owner prediction using cosine similarity (~85% accuracy) and reducing manual lookup time by 60% through real-time search and full CRUD functionality.

EDUCATION

Master of Computer Applications (MCA)

2025 – Present

DIT University, Dehradun · Machine Learning, DBMS, Data Structures, OS

B.Sc. — Physics, Mathematics & IT

2020 – 2023

Kumaun University, Nainital

CERTIFICATIONS & ACHIEVEMENTS

- SQL (Basic) — HackerRank Certificate of Accomplishment, July 2026
- Prepare Data for Analysis with Power BI — Microsoft (Microsoft Learn), December 2025
- Cleared IBPS PO & SBI PO Preliminary Exams — top percentile in Quantitative Aptitude & Logical Reasoning
