PROFESSIONAL SUMMARY

MCA student with hands-on experience in Python, SQL, and Power BI. Built data pipelines, customer segmentation models, and AI-powered applications. Seeking a data analyst or data science role to deliver actionable insights.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, C, Java (Basic)

Tools: Power BI, MS Excel, Flask, Jupyter, MySQL, GitHub, VS Code

Competencies: Data Analysis & Visualization, Machine Learning, ETL Pipelines, Statistical Analysis, DBMS

PROJECTS

India Rankings Analytics: UPA vs NDA (2004–2026) | *Python · SQL · Excel · Power BI* | 2026

- Built an end-to-end analytics pipeline comparing India's standing across 9 global indices (HDI, Corruption Perceptions, Passport Mobility, Press Freedom, Terrorism Impact, Pollution, Poverty, Unemployment, INR/USD) spanning 2004–2026, sourced from UNDP, World Bank, Transparency International, IEP, RSF, IQAir, Henley & Partners, and RBI.
- Engineered a SQLite database and Python (pandas, matplotlib) scripts to automate cleaning, transformation, and visualization of 22 years of multi-source ranking data.
- Designed an interactive Power BI dashboard with trend, scorecard, and slicer views to compare governance-era averages; delivered findings via Excel workbook and stakeholder-ready presentation.

AI Lost & Found System | *Flask · MySQL · Python · Similarity Matching* | 2024

- Built a Flask web app with MySQL backend; implemented AI-based owner prediction using cosine similarity (~85% accuracy).
- Designed responsive UI with real-time item search and full CRUD operations, reducing manual lookup time by 60%.

Retail Customer Analytics & Demand Forecasting | *Python · SQL · Power BI · K-Means* | 2024

- Analyzed 10,000+ retail transactions; applied K-Means clustering to segment customers into 4 actionable groups.
- Built 3 interactive Power BI dashboards visualizing revenue trends, churn risk, and demand forecasts for stakeholders.

Smart Traffic Control System | *Java · OOP* | 2023

- Designed a multi-lane traffic signal simulation using Java OOP (inheritance, polymorphism, abstraction).
- Simulated multi-lane intersection signal management using Java OOP; dynamic timing reduced simulated wait time by 25%.

EDUCATION

Master of Computer Applications (MCA) | DIT University, Dehradun | 2025 – Present

- GPA: 7.48/10.0 | Coursework: Machine Learning, DBMS, Data Structures, OS, Software Engineering

B.Sc. — Physics, Mathematics & IT | Kumaun University, Nainital | 2020 – 2023

- Relevant coursework: Mathematics, Statistics, and Information Technology — strong quantitative foundation.

CERTIFICATIONS & ACHIEVEMENTS

- Prepare Data for Analysis with Power BI — Microsoft (Microsoft Learn), Issued December 2025.
- Consistently strong academic performance in MCA with focus on data science and machine learning coursework.
- Cleared IBPS PO & SBI PO Preliminary Exams (multiple times) — top percentile in quantitative aptitude and logical reasoning.
- Developed strong problem-solving and time-management skills through rigorous competitive exam preparation.

SOFT SKILLS & INTERESTS

Analytical Thinking, Problem Solving, Team Collaboration, Adaptability | Interests: Data Analytics, Machine Learning, Business Intelligence, AI Research
